

Better RF Seals with advanced RF Systems

ONEX and 3KRF jointly design and manufacture advanced RF Sealers and assembly machines for Medical Devices, automotive, packaging, military, and stationery products.

Our systems feature:

- **3KRF** US Patented Solid State 1-10kw Modular RF Generators
- True Auto-Tune® analog-servo match networks
- 99% RF power efficiency: Achieved by real-time process control of forward & reflective powers
- 30-50% less power consumption: 8-10kw Solid State is equivalent to 15kw Tube style Generators
- Systems come with PLC controls and standard or PC based HMI
- UL and CE certification available
- Priced 50% less than European made RF-Seal systems
- Modular, 19" rack-mount generators and Match Networks, offer versatility when space saving and or quick upgrades are essential
- No more Black Magic: it's very easy to learn setup and operate
- RF sealing parameters can now be validated for IQ, OQ and PQ

If you are not satisfied or have issues with your RF welding process:

Inconsistent Welds; Tuning; Arc, Tubes, Over-Melting, Burning, Long Setups, Down Times

Contact us for process evaluation and new Solid State Generator or Turnkey system

We offer Economy and Advanced RF Systems: Shuttle, Rotary & Linear Lines
